

CHASE

Chase State Fishing Lake and Wildlife Area is located 1.5 miles west of Cottonwood Falls in the center of the scenic

Flint Hills region of Kansas. The 109 acre lake was constructed in 1954. The lake and surrounding 383 acre wildlife area are owned

and managed by the Kansas Department of Wildlife & Parks.

FACILITIES

A boat launching facility is located in the main use area. Boating on Chase State Fishing Lake is allowed for fishing only. Shore anglers will find several fishing piers that provide access to deep water. Pit toilets, firerings/grills, picnic tables and a shelter house are

available for campers, picnickers and anglers who wish to stay over night. A hand-pump water well is on the area, but the water is not drinkable. A swimming beach is also available for visitors.

FISHING

The lake has a steep to shallow rocky shoreline and shallow mudflats on the upper end. Water clarity is usually very good. Fair to excellent populations of channel catfish, crappie, bluegill, walleye, white bass, largemouth bass and flathead catfish are found in the lake. Wipers (white bass/striped bass hybrids) have been recently introduced. Several rocky islands and brush piles provide a variety of habitats where the angler may locate fish.

The following information should improve fishing success. However, these suggestions are general and success will be ultimately affected by weather and/or conditions. For up-to-date fishing information, anglers are encouraged to contract their local Wildlife and Park office. Or call the fishing hotline, (316) 800-ASK-FISH.

The best crappie fishing usually occurs in April and May during the spawning period. At this time, crappie are found close to shore and along the face of the dam.

Brush piles and the islands are excellent places to look for spawning fish. Minnows are a preferred bait.

Channel cats are most often caught from June through September off the face of the dam and the fishing piers. Live bait and shad sides produce the best catches. Excellent catfishing can be had by fishing the feeder creek after a heavy rain. When the stream is running strong, the catfish move into the stream channel and feed heavily.

Largemouth bass fishing peaks during mid to late May when the fish move into shallow water to spawn. The best places to look for largemouths at this time is in the shallow corners of the dam and other shallow shorelines near a drop-off. Special length and creel limits may be in effect for some species. Please check the Kansas Fishing Regulations Summary and all posted notices prior to fishing.

is open year-round for hiking, bird watching and other such non-hunting activities. A variety of wildflowers are abundant throughout the area.

WILDLIFE

Chase State Fishing Lake Wildlife Area consists of 383 acres of mostly native grass prairie. The camping area takes in approximately 23 acres with the remaining 360 acres open to hunting. All of the wildlife area

HUNTING

Chase State Fishing Lake supports populations of quail, rabbits, squirrel and deer; however, these populations are generally low. For this reason, the wildlife area receives very little hunting pressure. Cottontail rabbit are the most abundant game species. The area below the dam is the most productive rabbit cover.

Regulations for hunting the wildlife area are the same as for private land. Hunting is not permitted within the safety zone that encompasses the camping area. This area is clearly marked with standard red and white "Stop-Refuge Area-No Hunting" signs.

THING TO REMEMBER

Vehicles are restricted to established maintained roads. Off-road vehicle use is prohibited.

Individuals using the state lake must take their trash out with them. A no trash policy is in effect for this area, so no trash barrels are provided.

Consult information signs posted on the area for all regulations that apply to Chase State Fishing Lake and facilities.

General Area Map

Equal opportunity to participate in and benefit from programs described herein is available to all individuals without regard to race, color, national origin, sex, religion, age or handicap. Complaints of discrimination should be sent to Office of the Secretary, Kansas Department of Wildlife and Parks, 900 Jackson St., Suite 502, Topeka, KS 66612. 12/01
